Re: Landscape Water Conservation

Dear Water Conservation Professional:

Attached please find a complimentary copy of “Green Industry Best Management Practices for the Conservation and Protection of Water Resources in Colorado – Moving Towards Sustainability.” This manual identifies a variety of practices that we believe you will find to be beneficial in developing measures and programs to promote landscape water conservation in your community. Although the manual is targeted to landscaping professionals, it also provides a good general resource for local water providers and can be used as part of public education and training.

Also enclosed is a brief handout providing an overview of how the GreenCO BMPs and training program can be integrated into water conservation plans submitted to Colorado Water Conservation Board (CWCB). Please feel free to contact Brenda O’Brien, GreenCO Project Manager at (303) 973-4026 or [brenda.obrien@comcast.net](mailto:brenda.obrien@comcast.net) for more information about the GreenCO training program or the manual itself.

Very truly yours,

By   
Veva Deheza  
Section Chief, CWCB  
Office of Water Conservation & Drought Planning
